

## 40th Anniversary Year

The Black-E relaunch takes place in October. But we don't expect to explode into activity in the opening weeks. We plan to grow into activities over the coming months.

Remaining elements of the capital programme (including the installation of a main lift and the redevelopment of the entrance dome) are being planned to take place alongside a growing and developing cultural programme. Taking re-possession of the building - both the smartened-up familiar spaces and the exciting new spaces - will be an adventure, an exploration, an organic process. You are very welcome to come and see the new building. The activities you will find described here are the beginning of the beginning. Welcome to the relaunch of the Black-E !
